

COST

The cost for the I.T.S program is based on blocks or length of stay i.e. 30 /60 / 90 days. Each block is 30 days long so the cost is determined on how many blocks you will purchase. Each block is \$2,500.00 and a block is 30 days or less anything that extends over one block would immediately fall into the category of another additional block. The flight arrangements for your return would determine how many blocks you would need. The 30 days begins on your arrival date and your departure date would determine the amount of blocks you would be assessed.

1 block = \$2,500.00	30 days
2 blocks = \$5,000.00	60 days
3 blocks = \$7,500.00	90 days

The funds for this program would all be paid in full in advance. Reimbursements can only be made for blocks not used: example – If you purchased two (2) blocks and after 25 days needed to return home then the 2nd block valued at \$2,500.00 would be returned to the sponsor or person paying. We cannot pro rate days only blocks.

If you research Mission Internships you will find this to be an answer to many issues involving such programs. When you intern with us you can do it on a short term program allowing you to get involved without a year of commitment. You will have the best accommodations and a structured program resulting in a productive and moving experience in Foreign Mission work.

If you have an interest in joining us you may begin by filling out the Application section of this program and sending it to us when complete. It costs nothing to apply except your time. If your application is approved we would send you a packet with details and still you would have no financial obligation to us at that time. We are sure you will have questions but we prefer to answer all those details after we have acknowledged you as a candidate for the I.T.S. Program.

Dios le Bendiga
